EDUCATION

Whitworth University, Spokane, WA
Bachelor of Arts, Department of Kinesiology: Athletic Training, 2008
Athletic Training Distinction Award

University of Oregon, Eugene, OR
Master of Science, Department of Human Physiology: Athletic Training, 2011
Thesis: *Evaluation of Neuropsychological and Attentional Disturbances in Concussed High School Athletes*

University of Oregon, Eugene, OR
Doctorate of Philosophy, Department of Human Physiology: Biomechanics, 2014
Dissertation: *An Examination of Motor and Cognitive Recovery Following Concussion*

PROFESSIONAL EXPERIENCE

Assistant Athletic Trainer: August 2008 – June 2009
Department of Athletics
Whitman College, Walla Walla, WA 99362

Master's Student Graduate Teaching Fellow: August 2009 – June 2011
NATA Post-Professional Master's Graduate Athletic Training Program
Department of Human Physiology
University of Oregon, Eugene, OR 97403

Doctoral Student Graduate Teaching Fellow: June 2011 – July 2014
Motion Analysis Laboratory
Department of Human Physiology
University of Oregon, Eugene, OR 97403

Post-Doctoral Research Fellow: August 2014 – August 2017
Division of Sports Medicine, Department of Orthopaedics
Brain Injury Center
Boston Children's Hospital, Boston, MA, 02115
The Micheli Center for Sports Injury Prevention, Waltham, MA, 02453

Adjunct Instructor: January 2017 – May 2017
Athletic Training and Exercise Science Department
Lasell College, Newton, MA, 02466

Assistant Professor: September 2017 – Present
Department of Orthopedics
University of Colorado School of Medicine, Aurora, CO 80045

Lead Researcher: September 2017 – Present
Sports Medicine Center, Orthopedics Institute
Children’s Hospital Colorado, Aurora, CO 80045

Assistant Director of Clinical Research: January 2020 – Present
Department of Orthopedics
University of Colorado School of Medicine, Aurora, CO 80045

Funded Research Activities

Ongoing Funded Projects

Extramural Federally Funded Research Grants

“Sex Differences in Brain Structure and Function After Sports-related Concussion”

NIH NINDS R01: R01NS100952

Role: Site PI (PI: Inga Koerte, MD, PhD)

08/01/2017 – 07/31/2022

Purpose: To prospectively assess how sex differentially affects concussion severity and subsequent recovery on measures of brain structure and function.

Outcomes: 31522997

“A novel smartphone-based tool to quantify dual-task gait performance for concussion assessment”

NIH/NINDS Phase I SBIR Program: R43NS108823

Role: Site PI (PI Vipul Lugade, PhD)

09/30/2019 – 09/30/2020

Purpose: To develop a tool to evaluate single-task and dual-task gait and cognitive function in common clinical environments using a smartphone.

Extramural State Funded Research Grants

“Initiation of an Early Exercise Program to Improve Symptoms and Psychosocial Function after Pediatric Mild Traumatic Brain Injury”

MINDSOURCE Brain Injury Network New Investigator Award

Role: PI/PD

08/01/2019 – 07/31/2021

Purpose: To identify the effects of the initiation of an individualized sub-symptom aerobic exercise program within the first week of a mild traumatic brain injury (mTBI) on measures of persistent post-concussive symptoms and psychosocial function.

Extramural Foundation Research Grants

“Comparison of Braces for Treatment of Sever’s Disease in Barefoot Athletes”

American Medical Society for Sports Medicine Foundation Research Grant

Role: Co-Investigator (PI: Emily Sweeney, MD)

04/01/2018 – 03/30/2020

Purpose: To evaluate the effect of brace type on pain and functional outcomes among barefoot athletes with Sever’s disease

“Prevention of Post Traumatic Osteoarthritis in an Animal Model with Post-Traumatic Injection of a Chondroprotective Agent.”

Pediatric Orthopaedic Society of North America Research Grant

Role: Statistical consultant (PI: Jay Albright, MD)

07/01/2018 – 06/30/2020

Purpose: To determine if delayed injection of N-acetyl-cysteine after joint injury delays the progression of post-traumatic osteoarthritis in skeletally immature animals that represent the pediatric population.

“A multifaceted and interdisciplinary approach to improving pediatric concussion outcomes”

Tai Foundation

Role: PI/PD

11/01/2020 – 10/31/2022

Purpose: To examine brain neurochemistry among adolescents with a concussion, to discover clinical correlates underlying altered neurochemical profiles after concussion, and to monitor long-term outcomes.

Internal Foundation Research Grants

“Implementation of a sports injury prevention program to reduce subsequent injuries after concussion: a pilot randomized control study”

Children’s Hospital Colorado Research Institute Pilot Award

Role: PI/PD

01/01/2019 – 12/31/2021

Purpose: To generate pilot data evaluating the efficacy of a prophylactic sports injury prevention program aimed to reduce musculoskeletal injury risk after athletes return to play following a sport-related concussion.

Completed Funded Projects

Extramural Federally Funded Research Grants

“Improving quantitative recovery outcomes from concussion with aerobic exercise training”

NIH NICHD R03 NCMRR Early Career Research Award: R03HD094560

Role: PI

02/15/2018 – 12/31/2020

Purpose: To prospectively evaluate the efficacy of a sub-maximal aerobic exercise intervention on concussion recovery initiated soon after injury.

Outcomes: PMID 30376513, 31522997

“A software tool for objective identification of concussion-related vision disorders using a novel eye-tracking device”

NIH/NINDS Phase I STTR Award: R41NS103698

Role: Consultant (PI: Christina Master, MD)

02/15/2018 – 11/30/2019

Purpose: To develop a software product that provides an objective assessment of vision characteristics for use in concussion evaluations.

Extramural Industry Funded Research Grants

“Brain neurophysiological changes associated with mTBI”

Cincinnati Children’s Hospital Medical Center Subaward 4U01AI778109

Role: Site PI (PI: Gregory Myer, PhD)

03/01/16 – 06/30/18

Purpose: The goal of this project is to evaluate the clinical utility of a combined EEG-balance test protocol in the management of sport-related concussion.

Outcome: PMIDs 29933280, 29851513, 30509865, 30193950, 30762699

Extramural Foundation Research Grants

“The effects of concussion on neurophysiological function, motor control, and blood serum biomarkers in collegiate athletes”

Eastern Athletic Trainer’s Association Supported Research Grant Program

Role: Principal Investigator

08/15/16 – 1/31/18

Purpose: To determine the strength of association between post-concussion measures of function and recovery time.

Outcome: PMID 31141425

“Evaluation of the orientation/executive functions of attention and gait disturbances in concussed high school athletes: a pilot study”

National Athletic Trainers Association- Research and Education Foundation Master’s Research Grant Program

Role: Master’s student investigator

06/01/10 – 05/31/11

Purpose: The purpose of this study was to assess attentional and gait deficits initially after concussion and throughout the two months following injury in high school athletes.

Outcome: PMID 23274602

“Dual-task effect on gait balance control in adolescents with concussion”

International Society of Biomechanics- Student Congress Travel Grant

Role: Doctoral student investigator

02/01/13

Purpose: The goal of the study for this travel grant was to identify how dual-task assessments can assist in the objective monitoring of recovery after concussion.

Outcome: PMID 23643687

Intramural Student Research Grants

“Examination of recovery in motor and cognitive function following concussion in adolescents and young adults”

Eugene and Clarissa Evonuk Memorial Graduate Fellowship in Environmental, Cardiovascular, or Stress Physiology

Role: Doctoral student investigator

06/15/13 – 07/15/14

Purpose: The goal of this grant was to identify how dual-task balance control is affected after concussion and how such paradigms can assist in monitoring recovery from concussion.

Outcomes: PMIDs 27427835, 26291630, 26152463, 28169147
